

AWG-PNW Janet Cullen Tanaka Scholarship FAQ

Over the years we've gotten a number of questions about the scholarship and received applications that indicated that some people didn't understand what we're looking for in an application. We've put together some additional information in the form of questions and answers.

Q. I'm studying environmental science and have taken a few geology classes. Am I eligible for the Janet Cullen Tanaka scholarship?

A. No. Your major (or apparent major, based on classes taken) field of study must be a recognized geoscience (i.e., geology, geoengineering, hydrogeology). Other marginally related fields we consider ineligible include atmospheric sciences, civil engineering (unless there's a strong geotechnical emphasis), and forestry.

Q. I'm a resident of Washington (or Oregon) state but am attending college in another state. Am I eligible?

A. No. You must be attending an institution that offers at least three geoscience classes (2-year colleges) or a geoscience degree (4-year colleges or universities) located in Washington or Oregon. You do not need to be a permanent resident of Washington or Oregon.

Q. I'm a sophomore and have taken only one or two geology classes. Am I eligible?

A. Yes. However, unless you've taken at least two geoscience classes AND several supporting science/math classes AND have received generally good grades in them, you're unlikely to have a competitive application. You might want to wait a year to apply. That said, we have historically awarded scholarships to sophomores, including students at community colleges. Beyond course work, any independent study you've done in the geosciences, including high school science fair projects or Girl Scout projects, would be helpful.

Q. Do I send the Reference letters to you, or does the person referring me?

A. Please give the person who is referring you a stamped, addressed envelope with your request or ask them to email the letter to scholarship@awg-ps.org. You may want to ask for more than three letters, assuming that one person may not get it in before the time limit. You may use a family member as one of the three Referrals to support your statement of financial need. In fact, your entire application may be submitted via email to the same address, including a pdf version of your transcript.

Q. How do you judge the applications?

A. The Scholarship committee chair first reviews each application for eligibility and completeness. (Completeness is critical – you may wish to confirm with each of your references that letters were sent or emailed before the deadline.) Then, a committee of three to five AWG-PNW Chapter members (none of whom are college educators) carefully reviews those applications deemed eligible. We assign points among the three major criteria:

- Financial needs and current resources, as based on the applicant's essay and the non-academic Letter of Reference.
- Commitment to a geoscience career (which may include plans to teach earth science), mostly based on the applicant's essay and the academic letters of reference. We also look at supporting course work and the quality of writing in the essay to help assess the likelihood of success in a geoscience career.
- Academic achievement, as based on GPA, both in geoscience courses and the supporting math/science course work. We also look at the academic letters of reference for evidence of achievement that may not be directly reflected in grades. We do take into account recent improvements in grades – we realize that many people take a year or so to figure out college.

Then we each add up our scores and rank the applications. Occasionally, one application will stand out and our choice is easy. More typically, there will be a cluster of two or three applications at the top, and we'll need to break a virtual tie. We discuss the top applicants as a group and discuss/defend our scores. In general, financial need is a tie breaker since our ultimate goal is to award the scholarship to the woman for whom we think it will make the most difference in reaching her goal of becoming a geoscientist.

Q. I applied last year and didn't receive the scholarship. Can I apply again?

A. Yes, as long as you still meet the eligibility requirements we encourage you to reapply. In fact, your application will likely be stronger because you'll have more course work supporting it. In addition, your financial needs may be greater. The general quality and needs of the pool of applicants also varies from year to year.

Q. Are there any restrictions on what the scholarship cash award can be used for?

A. No. If you use it for tuition or books, that's great. If you need to use it for rent or food or utilities or transportation or child care, that's good too.

Q. Besides the \$1000 cash award, is anything else included with the scholarship?

A. Yes, the PNW Chapter will sponsor a one-year membership in AWG for the recipient if not already a member. However, the recipient must send us a completed membership application form for us to forward to AWG with a check from the chapter. In addition, we try to arrange a chapter meeting or social event to honor the recipient and give her a certificate. However, this isn't always possible given how spread out our chapter is and how busy the recipient may be. If no meeting can be arranged, we'd appreciate a picture of the recipient to include in our newsletter.

Q. If I receive the scholarship, why does it take until spring to receive the money?

A. Once we select a recipient, which we do by December 31, we then have to get the AWG Foundation to send the check and that can take a few months. You may receive it before spring, but we can't guarantee it.
